

# Healthcare Solutions

 **Hypertec** Systems

# MONITOR

Home Health Monitoring (HHM) is the use of IT and tele-communications to remotely monitor the health of patients in their homes. HHM provides considerable benefits such as improved patient outcomes, reduced long-term cost of care and hospital readmission rates. Moreover, the number of patients using this technology is expected to grow six-fold in the coming years.

Hypertec Systems provides a broad spectrum of healthcare services forming part of one of the largest and most successful Home Health Monitoring programs in Canada.

**Such services include:**

- › Warehousing and inventory management
- › Configuration and set-up of equipment
- › Installation of equipment in patient homes and training
- › Retrieval of equipment and disinfection

# SAVE

Hypertec Systems has a major footprint in the Canadian healthcare sector as a supplier of computer equipment and healthcare IT services to medical facilities. Backed by a professional team of certified technicians, our goals are to meet the needs of challenging medical facility environments by being both flexible and qualified to provide the best quality services at competitive rates.

**We can help your organization achieve its IT objectives by offering the following products and services:**

- › Brand-name and custom IT products
- › IT maintenance and contract-based hardware service agreements
- › Customized and highly flexible integration solutions
- › Business continuity and disaster recovery
- › IT infrastructure design, management and optimization

# Helping your business go further.

Founded in 1986, Hypertec Systems is a global technology provider that specializes in the delivery of integrated hardware and software solutions, IT maintenance, professional services and healthcare-related solutions. With its extensive product offering, including a full range of complementary services related to the design, implementation, management and maintenance of IT infrastructure and the nation's highest integration capacity, Hypertec Systems is considered to be one of the premier Value Added Resellers in Canada. The company's products and services are employed by organizations in such sectors as finance, aerospace, engineering, transport, retail, oil and gas, healthcare, government, education, to name a few.

By sourcing products through its long established vendor alliances that include all major manufacturers, Hypertec Systems is able to offer an unparalleled selection of IT and healthcare-related products together with a broad range of software. Hypertec Systems also operates numerous asset management, integration, document scanning and hardware service facilities containing the necessary infrastructure and certified personnel to store, integrate, scan and maintain virtually any type of IT or healthcare-related equipment or data.

Hypertec Systems assigns a very high level of importance to its quality assurance and has incorporated into its organizational structure both internal and external quality auditing practices – Hypertec Systems is certified ISO 9001 and ISO 14001 – not only to preserve but also to continuously improve its processes to ultimately better serve its customers.
